JavaScript

Install the OTPless SDK

Copy-paste this code on your login page

```
<script type="text/javascript" src="https://
otpless.com/auth.js"></script>
<!-- Get user's whatsapp number and
name -->
<script type="text/javascript">
  function otpless(otplessUser) {
    var waName = otplessUser.waName;
    var waNumber =
otplessUser.waNumber;
    // Signup/signin the user and redirect to
next page
  }
</script>
```

Need help? Get live support

React JS

Step 1 - Install the OTPless SDK

Copy-paste the code in your app's public/index.html file

```
<!-- OTPless SDK -->  
<script type="text/javascript" src="https://  
otpless.com/auth.js">  
</script>
```

Step 2 - Do Sign-up/Sign-in

Copy-paste the code on your login page

```
useEffect(() => {  
  // Define the 'otpless' function window.otpless  
  = (otplessUser) => {  
    // Get user's whatsapp number and name  
    const waName = otplessUser.waName;  
    const waNumber = otplessUser.waNumber;  
    // Signup/signin the user & redirect to next  
    page // ... }; }, []);
```

Angular

Step 1 - Install the OTPless SDK

Copy-paste the code in your app's src/index.html file

```
<!-- OTPless SDK -->  
<script type="text/javascript" src="https://otpless.com/auth.js">  
</script>
```

Step 2 - Do Sign-up/Sign-in

Copy-paste the code on your login page

```
constructor() {  
  // Define the 'otpless' function  
  window.otpless = (otplessUser) => {  
    // Get user's whatsapp number and name  
    const waName = otplessUser.waName;  
    const waNumber = otplessUser.waNumber;  
    // Signup/signin the user and redirect to next  
    page // ... }; }  
}
```
